PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on expertise in MERN Stack Development and strong analytical skills demonstrated through Java-based DSA problem solving. Proficient in database design and query optimization using SQL and MongoDB. Adept at building end-to-end web applications, from front-end interfaces to back-end logic, with a focus on performance, scalability, and clean code practices.

EDUCATION

GL Bajaj Group of Institutions — *Jun 2023 – Aug 2027*
B.Tech in Computer Science & Engineering — GPA: 7.51+ — *Mathura*

R.B.S Sr. Sec. School — *Apr 2023*
Intermediate — 70.5% — *Mursan, Hathras*

R.B.S Sr. Sec. School — *Apr 2021*
Highschool — 77% — *Mursan, Hathras*

TECHNICAL SKILLS

Languages : Java, JavaScript, SQL, C
Frontend : HTML, CSS, Tailwind CSS, React.js
Backend : Node.js, Express.js, REST APIs, JWT Authentication
Database : MongoDB, MySQL
Tools : Git, GitHub, VS Code, Postman
Coursework : Data Structures & Algorithms, DBMS, Oops Concepts

PROJECTS

WorkerConnect
MongoDB, Express.js, React.js, Node.js, Firebase

- A full-stack web platform that connects users with trusted skilled workers such as painters, electricians, plumbers, and mechanics.
- Built a responsive UI allowing users to search, filter, and view worker profiles based on location, service type, and ratings.
- Designed a simple booking flow where users can select a worker, choose a time slot, and confirm the request in a few clicks.
- Used MongoDB for persistent data and Firebase for authentication and real-time updates.
- Focused on a clean, mobile-friendly layout so both customers and workers can use the platform easily from any device.

Full Stack Authentication System
MongoDB / Express.js / React.js / Node.js / JWT / bcrypt

- Developed a secure full-stack authentication system with user registration, login, and protected dashboard functionality.
- Implemented JWT-based authentication and authorization to secure user sessions and protected routes.
- Integrated MongoDB for user account management and data persistence.
- Applied bcrypt password hashing and server-side validation to enhance application security.
- Built RESTful APIs using Node.js and Express.js for user authentication, profile management, and account operations.

ACHIEVEMENTS

- Secured Runner-Up position in a Hackathon organized at IET Lucknow, demonstrating strong problem-solving, rapid prototyping, and teamwork skills under time constraints.
